

## ABOUT PANELMATIC

Hello. We're Panelmatic. And we're here to help you take control of your company's control systems. But before we dive into what we can do, let's talk a bit about what we have done. Since 1957, we've made custom control solutions for America's top corporations in the chemical, environmental, food, pulp and paper, rubber, petroleum, pharmaceutical, glass, metals and utilities industries. With each sunrise, we continue to grow our portfolio and company, but we never shy away from who we are.

Like proudly stating that every product we make and deploy is made in the U.S. Or how our founder made the company employee-owned, so every employee has a stake in the company's future. We don't like to talk about being a committed company, because every company should be able to say that. We love being able to hang our hats on the commitment from our assembly and wiremen, who instinctively relocate to spike-demand locations to ensure your project is completed perfectly, and on schedule.

## NATIONWIDE CONVENIENCE, AT YOUR SERVICE

What started as one location in Youngstown, Ohio, has blossomed into seven facilities in five states across the nation. As you're reading this, we currently employ more than 160 people, and [half] have been with us for more than [20] years. Call any of our five locations to get expert insights and request a quote, and a devoted Panelmatic project manager will be with you every step of the way, ensuring a performing, perfect solution.

# CUSTOM SOLUTIONS, BECAUSE NO TWO ARE THE SAME

You name it, we can do it. Yes, even that. We can build anything from small junction boxes to multi-piece RIEs. We never shy away from a project (or anything Mother Nature tries to throw our way). In fact, we've done projects in almost every terrain and environment—like the frigid Russian tundras or the blistering Qatari deserts.

No two projects or the solutions are ever congruent, so we take the time to build them in spec and deliver them on-time and on-budget with unparalleled attention-to-detail. While we may be known for our wide variety of high-quality, custom-built control solutions, comprehensive service and manufacturing expertise, we like to be known as a team of experts who, simply put, loves what it does. Panelmatic's growth and success hinges on our commitment to quality, superb management, and personal, customized solutions.

## EXPERTS IN PROJECT MANAGEMENT

Every project we execute starts from your CAD file and leaves our building ready to be installed. We can execute every step of the manufacturing process. Our work is executed to ensure that all codes, regulations, and industry standards are followed, with special attention given to your unique criteria. Whether you need a single panel, console, or control house, our process sets Panelmatic apart. The benefit of our process is evident every time you work with us.

Our expertise guarantees that we can handle the largest and most complex projects with ease. This wide variety of expert solutions has made Panelmatic an industry leader for decades.

## TECHNICAL EXPERTISE

Our 60+ years of proven experience and expertise has allowed us to learn all the ins and outs of the industry. To guarantee seamless installations, every wire is tested multiple times, and every component is powered to ensure the panel matches your demands flawlessly. We do this before your FAT inspection and shipment, eliminating the need for costly work in the field. It's just another extra mile we're happy to travel to make sure your custom solutions are delivered accurately, on-time and on-budget.

### SOME OF THE CUSTOM SOLUTIONS WE PROVIDE ARE:

- Remote instrument enclosures
- Interposing relay panels
- Electrical houses
- Analyzers
- Marshalling panels
- Custom engraving
- Custom fabrication
- Racks
- Junction boxes
- Console panels
- PLC panels
- Power relay panels
- And more! (Just ask, and we'll eagerly roll up our sleeves.)
